What is **Secured by Design?**

Secured by Design (SBD) is the official police security initiative operated by the UK Police Service.

SBD provides a recognised standard for all security products that can deter and reduce crime and keep you safe – **Police Preferred Specification.**

SBD
Police Preferred Specification

Products that carry the SBD logo have been subject to rigorous testing and additionally been fully certificated by an independent, third-party certification body accredited by the United Kingdom Accreditation Service (UKAS), or European equivalent.

SBD is the only way for companies to obtain police recognition for security-related products in the UK.

What benefits does this bring for you?

Reductions in crime of up to 87% based on a 20 year study by Police Scotland

SBD accredited products will **reduce the likelihood of you becoming a victim of crime** and help keep you safer. Because products are robust, they will last longer too.

SBD is good for the environment too

Studies led by the University of Surrey (2016-17) have found that burglary prevention measures installed individually or in combination, were found to **produce less carbon emissions** than an incidence of burglary.
